Alex Rivera

Seattle, WA | alex.rivera@example.com | (555) 010-0123

PROFESSIONAL SUMMARY

Data analyst with four years of experience turning messy operational data into clear reports, dashboards, and recommendations for retail and logistics teams. Strong in SQL, Python, and Tableau, and at explaining results to non-technical audiences. Looking for a business intelligence or analytics role where I can own reporting end to end.

TECHNICAL SKILLS

Languages: SQL (PostgreSQL, MySQL), Python (pandas, NumPy, matplotlib), R

BI & Analytics: Tableau, Excel (pivot tables, XLOOKUP, Power Query), Power BI, Jupyter, A/B testing

Tools: Git, GitHub, Jira, Google Sheets, Confluence

Practices: Data cleaning, dashboard design, KPI reporting, stakeholder communication, documentation

PROFESSIONAL EXPERIENCE

Data Analyst, Brightline Retail Group, Seattle, WA *Jan 2024 – Present*

- Built and maintain 8 Tableau dashboards used by 12 store managers and 3 regional directors, replacing manual spreadsheet reports and saving about 6 hours of work per week
- Wrote SQL against a PostgreSQL data warehouse to analyze churn across 180,000 loyalty-program customers; identified a segment with 22% higher churn that led to a targeted win-back campaign
- Automated monthly sales data cleaning with Python (pandas), reducing reporting errors by 30% and cutting turnaround from 3 days to 1
- Designed and analyzed an A/B test on email subject lines (n = 40,000) that lifted open rates by 9% and was adopted as the new template
- Present monthly findings to merchandising and marketing leads, translating results into specific recommendations on promotion timing and inventory

Junior Data Analyst, Harbor Freight Logistics, Tacoma, WA *Jun 2022 – Dec 2023*

- Maintained Excel forecasting models for weekly shipment volume and reconciled figures with the finance team before each month-end close
- Built pivot tables and charts summarizing delivery delays across 40 routes, helping operations reduce late deliveries from 8% to 5%
- Wrote SQL queries to pull carrier performance data and flagged two underperforming vendors for contract review
- Documented reporting procedures in Confluence so new teammates could take over recurring tasks in under a week

Data Intern, Cascade Community Health, Seattle, WA *Jun 2021 – Aug 2021*

- Cleaned and coded 1,200 community survey responses and produced summary tables for the quarterly program report
- Created charts in Excel and R that the program director used in a presentation to the board

PROJECTS

Bike Share Demand Forecast | Python, pandas, Tableau

- Used a public ride dataset (2.1M trips) to build a weekly demand forecast with a seasonal regression model, reaching a 12% mean absolute percentage error
- Published an interactive Tableau dashboard showing seasonal and weather-driven demand patterns

EDUCATION

B.S., Statistics, Cascade State University, Seattle, WA *2018 – 2022*

GPA 3.6 | Relevant coursework: regression analysis, database systems, data visualization, experimental design

CERTIFICATIONS

Google Data Analytics Professional Certificate *2023*
